

Dragon Forge

The Dragon Forge is used to make powerful weapons and tools. The forge can be traveled to with [/warp forge](#). It is also connected to the white bridge that connects to the [shops](#), [court](#), and [PVP arena](#). There are 3 types of forges, although only the Aether Forge is currently usable. The other 2 types are the Draconic Forge and the Hellstone forge. The forge uses materials often found in [dungeons](#). This is considered "end game" content and it is suggested that you complete vanilla survival before diving into the forge.

Other information on the forge can be found in the [Dragon Forge book](#).
